

Product-Information

Alu-Clean E

GRM registered special cleaner for eloxal

Properties: for cleaning anodic-oxidized surfaces and alloy aluminium.
particularly suitable for removing grease and stains containing oil.

Alu-Clean E is a special cleaner for facades and other building components made of eloxal and aluminium. Apart from anionic-nonionic surface-active agents and cleaning components, which are highly effective in dislodging and dispersing dirt, Alu-Clean E contains complexing agents to prevent the formation of deposits and white tarnish. Moreover, Alu-Clean E contains protective colloids, stabilizing and dispersing agents for the dislodged dirt and corrosion inhibitors for the prevention of attacks on elox and aluminium.

In addition to its effective cleaning effect, Al-Clean E does not attack eloxal and aluminium

Dosage: dilute 1 : 20 up to 1 : 50 according to the toughness of stain

Directions for use: Apply Heidt & Schwarzfeld Alu-Clean E to the surface and let it react briefly. The cleaning effectiveness can be increased by rubbing off with a cloth or a nylon pad. Then, wash off thoroughly with water.

Application: 1 liter for approx. 20 m² according to toughness of stain

Note: Please follow carefully the instruction and safety recommendations out of the EU-safety regulation form

Specifications: Experiment: minimum of 2 years
pH-value: 7 - 8 in concentrate
contents: watery solution of anionic and non-ionic
tensides and pyrophosphate
drainage-safe (biodegradable)

container size: 20 ltr./container
